REMEDY FOR FRUIT TREE DISEASES. -Prof. R. L. Galloway, chief of the section of vegetable pathology, Department of Ag riculture, has recently succeeded, as the resuit of practical experiments, in producing a remedy for the diseases called pear-leaf blight and apple mildew, which annually causes great destruction to these treer. As a result of practical experiments be feels justified in recommending it to the farmers and fruit-growers as both efficacious and reconomical. The remedy consists of the application of a fungicide with appliance, by which 50,000 plants were sprayed in a day and a half at a cost, not including labor, of \$4.75 for each application, five being required to secure good results. Experiments of a similar nature were carried on in the same nurseries, by which a block of some 200,000 apple seedlings affected by the powdery mildew was treated with a prepa-ation at a total cost of not exceeding two cents per 1,000 trees. The results in this case also have proved highly satisfactory.

The Giant Diamond lately discovered in Cape Colony, and now at the Paris Expu-sition, weighs one hundred and eighty car · ts, and is valued at \$3,000,000. It is kept n a glass case by itself and guardians stand around it all day. At night it is placed in a big safe, which is similarly guarded all night.

Some years ago a gentleman in London bought a pen and ink portrait of Alexander Pope, sur-rounded by a design of scroll work. Upon examin-ing it through a glass he was astonished to find the lines in the surrounding scroll were a biograthe lines in the surrounding scroll were a biography of the poet so minutely transcribed as to be legible only by the sid of a magnifier.
